Dear Parents/Guardians,

To ensure that our students have access to the necessary tools for their mathematical and scientific subjects, we are informing you of the College's expectations around the requirement for every student to have their own specified calculator.

For students in Years 7 and 8:

Students in Years 7 and 8 are required to purchase a Casio Scientific calculator. This type of calculator is essential for basic mathematical calculations and scientific functions that your child will encounter during their early high school years. If your child does not already have one, we kindly ask that you purchase a Casio scientific calculator for them.

For students in Years 9-12:

Students in Years 9-12 are required to have a TI-84 Graphics calculator. This advanced calculator is crucial for more complex mathematical operations and graphing functions, especially as students' progress through their senior maths courses.

How to order

For your convenience, we have attached order forms for either of these calculators to be purchased directly through Abacus Calculators at a competitive price and delivered directly to the school. You will notice that there are some optional accessories available to purchase. The TI-84 Graphics Calculator comes with a USB connection cable to charge the calculator; however this is a trickle charger, and the fast-charging adaptor is a recommended addition and is better for optimum battery life.

Additionally, we would like to emphasise that if your child will be in Years 7 or 8 in 2024 you are welcome to purchase a graphics calculator for them now, instead of a Casio scientific model. A graphics calculator can be an excellent long-term investment, as it will serve them well not only in Years 7 and 8 but also through Years 9-12 and beyond.

We understand that purchasing calculators can be an additional expense, and we want to assure you that these tools are essential for your child's academic growth and success in their secondary schooling. We believe that having the right calculator will enhance their learning experience and help them excel in their mathematics and science courses.

If you have any questions or concerns regarding this calculator policy, please do not hesitate to contact your child's maths teacher or the Mathematics Leader of Learning (Anna Beinke). We are here to support you and your child's educational needs.

Thank you for your cooperation and commitment to your child's education. We look forward to a successful academic year ahead and are excited to see your child thrive at Thomas More College.

Sincerely,

Anna Beinke

Leader of Learning - Mathematics
